THE **NEW**

POSSIBLE™

renuvion®
FACIAL RENEWAL

Not an actual patient

WORKS

LIKE NOTHING

ELSE

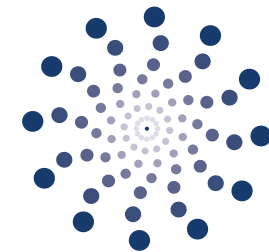

In a marketplace long-dominated by laser treatments, true innovation has been scarce. Renuvion is different. It's the first major advancement in decades of skin treatments for the face, providing patients with dramatic and natural-looking results — **This is Facial Renewal.**

BEYOND RESURFACING

Renuvion, with its unique mechanism of action, allows for smoothing and contracting of the skin in one procedure, taking transformation to a whole new level - *beyond dermal resurfacing.*¹

Smooths

Contracts

THE RENUVION DIFFERENCE

Unique technology, unique results

Lasers and other resurfacing technologies don't always satisfy.² Renuvion has been shown to dramatically reduce deep wrinkles and rhytides, with a high level of physician and patient satisfaction.¹

High impact – without surgery

Facelifts lift and tighten by treating the structures under the skin, but not the skin directly.³ Renuvion directly treats the skin, providing a smooth, radiant look — without cutting.¹

Profound change, natural effect

High-impact cosmetic procedures often have unnatural-looking results. With Renuvion, patients state that they look healthy and natural, like 'rewinding the clock.'

REAL RENEWAL

These results were achieved in IDE clinical study G170151, using a single-pass technique.

REAL RESULTS

Renuvion has been vigorously tested in clinical studies and has been shown to be safe and effective for treatment of moderate to severe wrinkles and rhytides.¹ Additionally, preclinical data shows benefits when compared to the alternative plasma energy device.⁴

In a prospective multicenter study of 55 patients,¹ Renuvion demonstrated:

98.2%

Treatment success

90.9%

Self-reported
appearance improvement
in 3 months

**High level of
patient satisfaction**

In preclinical testing, Renuvion showed benefits over the nitrogen plasma system, both in maximum contraction and depth of thermal effect.⁴

193-269%

Greater tissue/wrinkle reduction

54-71%

Less depth of thermal effect

RAVE REVIEWS

“Over 7 years and 700 procedures later, there is still nothing that can provide the same results as Renuvion.”

Joe Delozier, MD
Plastic Surgeon, Nashville, TN

“Renuvion gives me the ability to treat the texture and quality of the skin that I’ve never had before, and I’m getting amazing results with the technology.”

Michael Lin, MD
Dermatologist, Beverly Hills, CA

“I tried microneedling, chemical peels, and fractional CO₂ resurfacing without significant improvement to my lines and wrinkles. Renuvion gave me the results that I was looking for.”

Renuvion Patient

“Based on my experience with the technology, Renuvion is completely different and I’ve seen benefits in lifting, tightening, reducing lines, wrinkles and sun damage. Nothing else can provide this level of utility.”

Vaishali Doolabh, MD
Plastic Surgeon, Jacksonville, FL

“This is the magic wand. I literally see wrinkles vanishing during use.”

Melinda Lacerna, MD
Plastic Surgeon, Bradenton, FL

“I didn’t want a facelift so Renuvion was the perfect option as it gave me an amazing, natural-looking result.”

Renuvion Patient

Experience you can trust

Apyx® Medical is deeply rooted in the medical space. The Renuvion technology was originally developed for procedures in gynecology, oncology and other surgical specialties under the name J-Plasma®.

We bring the same scientific rigor to cosmetic medicine, using evidence-based research to validate claims, and to educate clinicians and patients on what to expect from their Renuvion experience.

Disclaimer, disclosures, risk statement

The Renuvion Dermal Handpiece is indicated for dermatological procedures for the treatment of moderate to severe wrinkles and rhytides, limited to patients with Fitzpatrick skin types I, II, or III.

Warning: Application of more than one treatment pass in the perioral area, on the forehead, and along the jawline has been associated with hypertrophic scarring.

Risks associated with the use of the Renuvion Dermal System include but are not limited to hypertrophic scarring, milia/acne, telangiectasia (spider veins), skin discoloration/hypopigmentation, dormant infection reactivation, infection, bruising or bleeding. As with any procedure, individual results may vary. As with all energy devices there are inherent risks associated with its use; refer to the IFU for further information.
